

LOS	REGIONAL	Description: Project is located at the site of the current County Road and Bridge Shop property. The county is operating a gravel pit behind the complex that will eventually be reclaimed. The pit will eventually be left as a pond filled from ground water. Because the county currently owns the property and there is a conservation easement on the land to the north and west there is a low likelihood of sale of the property for development. It would make a excellent future park with water access for the Region and the Community of Four Corners.
SERVICE AREA	BB4
